Information for Contributors

Authors should send their contributions directly to the Contributing Editor or Editor whose field of interest is most closely related to the subject matter.

Advertising information. Advertising orders and enquiries can be sent to: **Europe and ROW**: Rachel Gresle-Farthing, Elsevier Science Ltd, Advertising Department, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK; phone: (+44) (1865) 843565; fax: (+44) (1865) 843976; e-mail: r.gresle-farthing@elsevier.co.uk. **USA and Canada**: Elsevier Science Inc., Mr Tino DeCarlo, 655 Avenue of the Americas, New York, NY 10010-5107, USA; phone: (+1) (212) 633 3815; fax: (+1) (212) 633 3820; e-mail: t.decarlo@elsevier.com. **Japan**: Elsevier Science Japan, Advertising Department, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106-0044, Japan; phone: (+81) (3) 5561 5033; fax: (+81) (3) 5561 5047.

Annual Institutional Subscription Rates 1999: Europe, The CIS and Japan, NLG 2478.00. All other countries, U.S. $1258.00. Associated Personal Subscription rates are available on request for those whose institutions are library subscribers. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Orders, claims, and product enquiries: please contact the Customer Support Department at the Regional Sales Office nearest you:

New York: Elsevier Science, PO Box 945, New York, NY 10159-0945, USA; phone: (+1) (212) 633 3730 [toll free number for North American customers: 1-888-4ES-INFO (437-4636)]; fax: (+1) (212) 633 3680; e-mail: usinfo-f@elsevier.com

VOLUME CONTENTS

Number 1

L. Marino, G. Saccomandi and C. Valente	1	A note about three-dimensional exact dynamical solutions for neo-Hookean materials
V.A. Lubarda	5	Apparent elastic constants of cubic crystals and their pressure derivatives
M.A. Petrakis and G.T. Karahalios	13	Fluid flow behaviour in a curved annular conduit
A. Maccari	27	Non-linear oscillations with multiple resonant or non-resonant forcing terms
L. Wang	35	Competition of Coriolis instability with centrifugal instability and its effect on heat transfer in a rotating curved heated channel
E. Figueira da Silva, J.S. Pérez Guerrero and R.M. Cotta	51	Integral transform solution of boundary layer equations in stream function-only formulation
I.J. Rao	63	Flow of a Johnson–Segalman fluid between rotating co-axial cylinders with and without suction
D.E. Panayotounakos, P. Andriotaki-Panayotounakou and G. Papandonopoulos	71	Ad hoc exact solutions for the stress and velocity fields in rigid perfectly plastic materials under plane-stress conditions
A.T. Eswara and G. Nath	85	Effect of large injection rates on unsteady mixed convection flow at a three-dimensional stagnation point
M.A. Pinsky and A.A. Zevin	105	Oscillations of a pendulum with a periodically varying length and a model of swing
E. Esmailzadeh and A.R. Shahani	111	Longitudinal and rotational coupled vibration of viscoelastic bars with tip mass
C.V. Easwaran and S.C. Chikwendu	117	A Laplace-Transform multiple-scale procedure for the asymptotic solution of weakly non-linear partial differential equations
N. Antar and H. Demiray	123	Non-linear wave modulation in a prestressed fluid field thin elastic tube
A. Raman and C.D. Mote Jr	139	Non-linear oscillations of circular plates near a critical speed resonance

S. Chiriţă and L. Nappa 159 Effects of Saint-Venant type and uniqueness and continuous dependence results for incremental elastodynamics

F. Pan, M.F. Beatty 169 Instability of an internally constrained hyperelastic material

A. Donato and A. Palumbo 179 Waves features related to a mathematical model of hypoplasticity

H. Demiray 185 Dressed solitary waves in fluid-filled elastic tubes

Number 2

N. Kim and L. Debnath 197 Resonance wave interactions in a weakly viscous liquid

J.-h. Jeng and B. Hassard 221 The critical wave number for the planar Bénard problem is unique

L. Gunatilake, J.J. Shepherd and H.J. Connell 231 Transition in a non-linear second-order system

E.M. Mockensturm and C.D. Mote Jr. 247 Steady motions of translating, twisted webs

D.H. Hodges, D. Harursampath, V.V. Volovoi and C.E.S. Cesnik 259 Non-classical effects in non-linear analysis of pretwisted anisotropic strips

H.-K. Hong and C.-S. Liu 279 Internal symmetry in bilinear elastoplasticity

S. Erbay 289 Coupled modified Kadomtsev–Petviashvili equations in dispersive elastic media

Ülo Lepik 299 Bifurcation analysis of elastic–plastic cylindrical shells

J. Jena and V.D. Sharma 313 Self-similar shocks in a dusty gas

A.C. Briozzo, M.F. Natale and D.A. Tarzia 329 Determination of unknown thermal coefficients for Storm's type materials through a phase-change process

M. Yürüsoy and M. Pakdemirli 341 Group classification of a non-Newtonian fluid model using classical approach and equivalence transformations

M. Massoudi and T.X. Phuoc 347 Flow and heat transfer due to natural convection in granular materials

H.W. Haslach Jr. and N. Zeng 361 Maximum dissipation evolution equations for non-linear thermoviscoelasticity

Technical note
M. Lutzky 387 Conserved quantities from non-Noether symmetries without alternative Lagrangians

Number 3

U. Akyüz and A. Ertepinar	391	Stability and asymmetric vibrations of pressurized compressible hyperelastic cylindrical shells
A. Akinola	405	On interacting longitudinal-shear waves in large elastic deformation of a composite cylindrical laminate
M.F. Abdul Azeez and A.F. Vakakis	415	Numerical and experimental analysis of a continuous overhung rotor undergoing vibro-impacts
W.Q. Zhu and Z.L. Huang	437	Stochastic Hopf bifurcation of quasi-nonintegrable-Hamiltonian systems
S.V. Meleshko	449	Group classification of two-dimensional stable viscous gas equations
C. Godano and F. Oliveri	457	Non-linear seismic waves: a model for site effects
E. Pucci and G. Saccomandi	469	Universal motions for constrained simple materials
D. Bresch and J. Lemoine	485	On the existence of solutions for non-stationary third-grade fluids
L.N. Virgin, E.H. Dowell and M.D. Conner	499	On the evolution of deterministic non-periodic behavior of an airfoil
R.C. Kar and S.K. Dwivedy	515	Non-linear dynamics of a slender beam carrying a lumped mass with principal parametric and internal resonances
C. Sophocleous and J.G. Kingston	531	Cyclic symmetries of one-dimensional non-linear wave equations
D.-X. Kong	545	Asymptotic blow-up time of classical solutions for general quasilinear hyperbolic systems and its applications
G. Akgün and H. Demiray	571	Non-linear wave modulation in a prestressed viscoelastic thin tube filled with an inviscid fluid

Number 4

G.K. Gupta	589	Hydrodynamic stability of the plane Poiseuille flow of an electrorheological fluid
A. Georgescu and D. Mansutti	603	Coincidence of the linear and non-linear stability bounds in a horizontal thermal convection problem
S. Lenci, G. Menditto and A.M. Tarantino	615	Homoclinic and heteroclinic bifurcations in the non-linear dynamics of a beam resting on an elastic substrate

P.M. Mariano	633	Some remarks on the variational description of microcracked bodies
V.O. Vakhnenko, V.A. Danylenko and A.V. Michtchenko	643	An asymptotic averaged model of non-linear long waves propagation in media with a regular structure
G. Chakraborty, A.K. Mallik and H. Hatwal	655	Non-linear vibration of a travelling beam
B. Wu	671	Constructive analysis of buckling mode interactions with single Z_2-symmetry
M.E. Fares	685	Mixed variational formulation in geometrically non-linear elasticity and a generalized *n*th-order beam theory
R.-F. Fung, Y.-C. Wang and J.-W. Wu	693	Group properties and group-invariant solutions for infinitesimal transformations of the non-linearly traveling string
J.-H. He	699	Variational iteration method—a kind of non-linear analytical technique: some examples
B. Popescu and D.H. Hodges	709	Asymptotic treatment of the trapeze effect in finite element cross-sectional analysis of composite beams
D.H. Hodges	723	Non-linear inplane deformation and buckling of rings and high arches
M. Grigoriu	739	Moment closure by Monte Carlo simulation and moment sensitivity factors
W.K. Lee and H.D. Park	749	Second-order approximation for chaotic responses of a harmonically excited spring–pendulum system
S.-J. Liao	759	An explicit, totally analytic approximate solution for Blasius' viscous flow problems

Number 5

S.B. Lee and A. Wineman	779	A model for non-linear viscoelastic axial response of an elastomeric bushing
R. El Abdi and H. Samrout	795	Anisothermal modelling applied to brake discs
A.D. Drozdov	807	Mechanically induced crystallization of polymers
Q.K. Ghori and Naseer Ahmed	823	Principles of Lagrange and Jacobi for non-holonomic systems

E.P. Hadjigeorgiou, V.K. Kalpakides and C.V. Massalas	831	A general theory for elastic dielectrics – Part I. The vectorial approach
M. Di Paola and A. Pirrotta	843	Non-linear systems under impulsive parametric input
V. Gattulli and R. Ghanem	853	Adaptive control of flow-induced oscillations including vortex effects
M.A. Ilgamov and R.A. Ratrout	869	Large deflection of superconducting cable
C.-H. Hsu, Y.-P. Chang and B.-C. Chen	881	Transient mixed convection of a second-grade fluid past a backward-facing step
A.M. Siddiqui, T. Hayat and S. Asghar	895	Periodic flows of a non-Newtonian fluid between two parallel plates
G. Rega, W. Lacarbonara, A.H. Nayfeh and C.M. Chin	901	Multiple resonances in suspended cables: direct versus reduced-order models
I. Pop and T.-Y. Na	925	Natural convection over a vertical wavy frustum of a cone
D.W. Coffin and F. Bloom	935	Elastica solution for the hygrothermal buckling of a beam
A.N. Kounadis and D.S. Sophianopoulos	949	Conditions for the occurrence of limit cycles in autonomous potential damped systems
E.P. Hadjigeorgiou, V.K. Kalpakides and C.V. Massalas	967	A general theory for elastic dielectrics. II. The variational approach
	981	Erratum

Number 6

K. Yagasaki	983	Codimension-two bifurcations in a pendulum with feedback control
D. Harursampath and D.H. Hodges	1003	Asymptotic analysis of the non-linear behavior of long anisotropic tubes
M.E. Erdoğan	1019	Flow due to parallel disks rotating about non-coincident axis with one of them oscillating in its plane
K. Vajravelu and T. Roper	1031	Flow and heat transfer in a second grade fluid over a stretching sheet
J.C. Umavathi and M.S. Malashetty	1037	Oberbeck convection flow of a couple stress fluid through a vertical porous stratum

R. Haberman and R. Rand	1047	Sequences of orbits and the boundaries of the basin of attraction for two double heteroclinic orbits
Y. Wei	1061	Basic vibrations and anharmonic analysis of a vibration
P. Vadasz and S. Olek	1071	Computational recovery of the homoclinic orbit in porous media convection
F. Oliveri and M.P. Speciale	1077	Exact solutions to the equations of perfect gases through Lie group analysis and substitution principles
P.W. Doyle	1089	Symmetry and ordinary differential constraints
M.A. Jalali and B. Mehri	1103	Periodicity and chaos in a flexible crank-rocker mechanism
H.-K. Hong and C.-S. Liu	1113	Lorentz group $SO_o(5, 1)$ for perfect elastoplasticity with large deformation and a consistency numerical scheme
	1131	Announcement
